

# Accelerate developer onboarding

## Make your codebase accessible for your entire team.

Sourcegraph enables self-serve onboarding, decreases time to first commit for new developers, helps existing engineers master your codebase, and fast-tracks full codebase understanding.

You need to...	With Sourcegraph you can...
 <b>Make complex codebases accessible</b>	Intuitively search across complex codebases with thousands of repositories so that the entire codebase is accessible and learnable.
 <b>Enable self-serve onboarding</b>	Find code and context in your repositories so you can answer your own questions.
 <b>Understand code history and ownership at a glance</b>	Reveal who updated code and when, helping developers find the right stakeholders to solve problems effectively.
 <b>Visualize your contributions</b>	Track the progress of deployed code, measure new feature adoption, and quantify the value of your team's work to company leadership.
 <b>Document and share actionable code snippets</b>	Create always up-to-date, living documentation with familiar features like Markdown and novel capabilities like embedded searches, snippets, and symbols.
 <b>Encourage confidence as developers shift to new projects</b>	Help experienced developers maintain turnaround times as they onboard to new parts of your codebase. Identify examples to learn from across your company's private repositories and the open source universe with intuitive code search.

Engineering teams at the world's most innovative companies use Sourcegraph to onboard new and experienced developers.

## CONVOY

"For our new developers, Sourcegraph has been invaluable to get to know the repository structure, to track down where code lives, and self-service during their investigations."

**Owen Kim | Senior Software Engineer at Convoy**

## LUNAR

"Sourcegraph makes it possible for us to enable every team to develop autonomous practices and solve cross-coding issues. This autonomy is vital to ensure developers and their teams can accomplish their day-to-day work in isolation without being blocked."

**Bjørn Hal Sørensen | Web Architect at Lunar**

## Give your team the onboarding experience they deserve.

Make your codebase accessible and enable all your devs to find the answers they need to work more efficiently, ship code more confidently, and stay in flow.
